

Nexus 9 Front Facing Camera Replacement

Replace the front-facing camera.

Written By: Geoff Wacker

INTRODUCTION

Use this guide to replace the front-facing camera on your Nexus 9.

TOOLS:

- [Tweezers](#) (1)

PARTS:

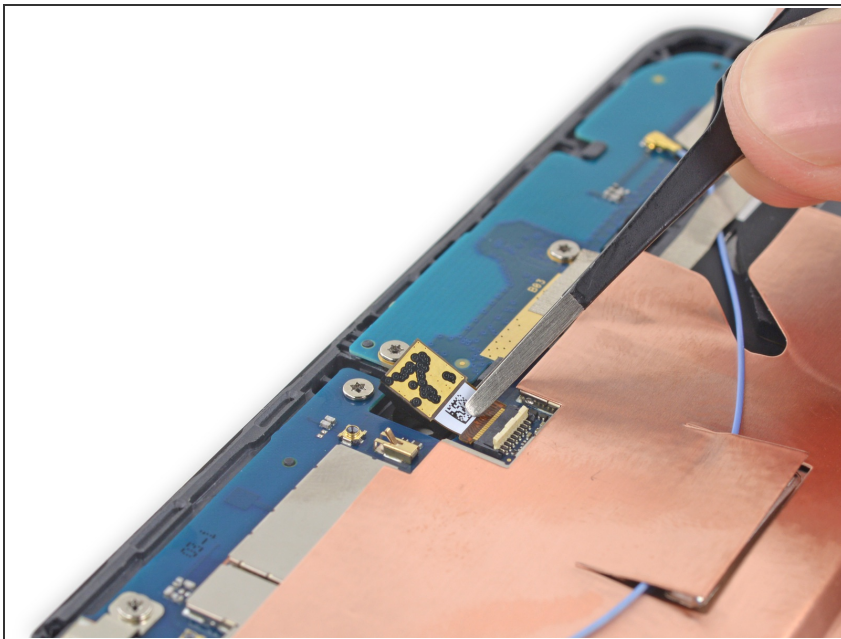

- [Nexus 9 Rear Panel](#) (1)
- [Nexus 9 Front Camera](#) (1)

Step 1 — Rear Case

- With your fingers, carefully pry off the back plastic casing. Starting at the corners is usually the easiest.
- ⓘ The rear-facing camera seems to fit a little too snugly in its compartment on the rear case; so make sure that it stays connected to the motherboard.

Step 2 — Front Facing Camera

- Use a spudger to disconnect the front-facing camera ZIF connector.
- Use a pair of tweezers to gently lift the front-facing camera up from the motherboard.

To reassemble your device, follow these instructions in reverse order.
